EL GATO COFFEE

App is a mobile coffee bean store designed for people who want to discover and buy coffee beans easily. The app allows users to browse coffee beans, filter them by light, medium, or dark roast, view detailed product information, choose a package size and quantity, save favorites, and add products to their cart.

Problem: choosing coffee beans can be confusing because customers often see many products without quickly understanding their roast level, origin, tasting notes, or package size.

Target Users: coffee lovers and anyone who brews coffee at home and want a simple way to explore different beans.

Goal: to make buying coffee beans simple, visual, and enjoyable, using a warm design and pixel-art elements inspired by coffee-growing regions.

Prototype Design

The UI/UX design focuses on a cute, cozy, and minimalist shopping experience with playful pixel-art elements. The interface uses a warm pastel color palette, rounded product cards, and soft typography to reflect the EL GATO brand identity. A clean layout, simple navigation bar, search function, and roast-level filters make it easy for users to browse and discover coffee beans without overwhelming the screen.
